ISO CERTIFIED 9001:2000

October 29, 2012

Ref: LEEDS Certified Ice Melt

The Landscaper's Choice Ice Melt is Leeds Compliant. No standard exists for Leeds and ice melter certification.

The Leeds program is designed around sustainability. The Landscaper's Choice Ice Melt has one of the lowest application rates in the market. Landscaper's Choice Ice Melt is about one third the application rates vs. Calcium Chloride

Landscaper's Choice Ice Melt is made of natural ingredients.

The CMA component acts to tie up the chloride ion to not allow it to travel thru ground water.

As part of best practices, pre treating the surfaces with Landscaper's Choice Ice Melt before a storm will not allow the snow and ice to bond to the surface. Landscaper's Choice Ice Melt can be pre-applied while other chemistry cannot.

Sincerely,

The Kissner Group
